Cable Assemblies***

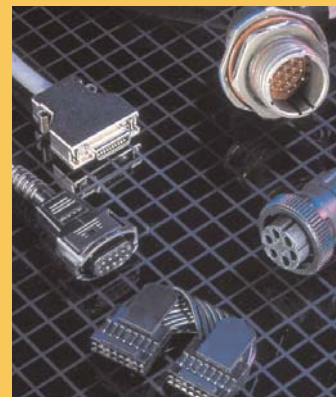

SPI Industrial Cable Assemblies

For over twenty years SPI has filled the need as a value added cable assembly manufacturer. We've given each of our OEM customers catered individual attention whether building products to meet their specifications or supplying an SPI custom engineered product designed specifically for their application. With our highly skilled design team and our global manufacturing capabilities SPI continually meets the challenge of providing cost competitive cable assembly solutions.

We look forward to serving you!

- Overmold Capability
- Potting
- High Flex Applications
- Engineered Cable Assemblies
- I/O Cables

Services:

- Global Manufacturing
- MRP Management
- Inventory Control

CUSTOM OEM CABLE ASSEMBLIES

SPI was established in 1984 with a primary focus on providing cylindrical connectors and building cable assemblies for the military and aerospace markets. Over the years we have extensively broadened the markets we serve and the range of solutions we offer, but our entire focus is still on interconnections of all types with a particular emphasis on OEM custom designs.

In addition to the cable assemblies featured in this brochure we also offer a comprehensive line of industrial connector products. Please visit our web site to see our full product line.

We look forward to the opportunity to serve you!
